AAAS Response to Coronavirus and U.S. Federal Government Communication

“Trust during times of increased concern about public health is paramount. For more than 30 years, leaders at the National Institutes of Health, CDC and other federal government agencies have led our nation’s response to critical public health issues. We must ensure that informed perspectives from top U.S. public health experts are heard and shared. An overtly political response to coronavirus will not build public trust and poses serious risks to public health.”

— Sudip Parikh, chief executive officer, American Association for the Advancement of Science (AAAS)

#

The American Association for the Advancement of Science (AAAS) is the world’s largest general scientific society and publisher of the journal *Science*, as well as *Science Translational Medicine*; *Science Signaling*; a digital, open-access journal, *Science Advances*; *Science Immunology*; and *Science Robotics*. AAAS was founded in 1848 and includes nearly 250 affiliated societies and academies of science, serving 10 million individuals. *Science* has the largest paid circulation of any peer-reviewed general science journal in the world. The nonprofit AAAS is open to all and fulfills its mission to “advance science and serve society” through initiatives in science policy, international programs, science education, public engagement, and more. For additional information about AAAS, see www.aaas.org.
